

Ntethelelo Mdletshe

TOP 10 KZN Shaper

Background and goals

Ntethelelo Mdletshe has been farming produce for three years, with a strong focus on increasing efficiency and productivity. His short-term goals include achieving a yield of 10 tons per hectare, training his staff, and implementing an irrigation system. Over the next 3 to 5 years, he plans to invest in tunnels and expand into livestock farming.

Challenges

Financial and operational constraints limit Ntethelelo's farm productivity and overall efficiency.

Opportunities and support needed

Ntethelelo sees significant potential in expanding crop production and incorporating technology into his operations. He is particularly interested in using drones for irrigation and requires funding for essential assets and operational improvements to achieve sustainable growth.
